

## Joystick grip 361G.../362G...

**Ergonomic actuation for right or left hand users.**

The modular design of the ergonomic joystick handle allows it to be flexibly adapted to suit many applications. It offers a cost effective solution, even in low purchase quantities.

### Technical specifications

- The Joystick grip 361G has been ergonomically designed for right handed operators, and 362G for left handed operators
- Fully illuminated, night and function illumination options are also available
- The CAN controller integrated in the handle facilitates a simple bus connection (CANopen / SAE J1939)
- Optionally available with capacitive presence detection
- Handle available with micro push button switches for use outside of the cabin
- Various colour choices are available for the mounted operator controls

### Capacitive presence detection

The 36IG/362G is optionally available with a capacitive touch sensor to detect when operators are touching the handle.

*Capacitive presence detection is not permissible for safety-critical applications!*

## Environmental conditions

| Attribute                  | 36.G...       |
|----------------------------|---------------|
| Operating temperature min. | -25 °C        |
| Max. operating temperature | 85 °C         |
| Min. storage temperature   | -40 °C        |
| Max. storage temperature   | 85 °C         |
| Shock resistance (Norm)    | EN 60068-2-27 |

## Connection

| Attribute    | 36.G... |
|--------------|---------|
| Cable length | 0.5 m   |
